

U.S. Ser. No. 09/955,253
Applicants: Kreutz et al.

Atty. Dkt. B06090-D

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Claims 24 through 49 and Claims 61 through 73: Cancelled without prejudice.

cl
50. (currently Amended). A depilation apparatus comprising
a housing,
a depilation member for gripping hairs on human skin and pulling the hairs from the skin,
and
a vibration member for exerting mechanical vibration on the skin to thereby provide an
anaesthetizing effect on the skin while the hairs are being pulled from the skin by the depilation
member, both the depilation member and the vibration member provided in the housing,
characterized in that
the vibration member comprises flexible protrusions for contacting the skin which are
disposed on a carrier, said flexible protrusions having distal ends remote from said carrier and
proximal ends adjacent said carrier whereby the distal ends are located above said proximal ends,
and
the vibration member vibrates while the carrier is cyclically brought towards and away
from the skin during operation of the depilator apparatus to thereby vibrate the flexible protrusions
and thereby exert mechanical vibrations on the skin where these vibrating flexible protrusions
contact the skin.

51. (previously presented). A depilation apparatus as claimed in claim 50, characterized in that the
protrusions are disposed in a uniform pattern.

U.S. Ser No. 09/955,253
Applicants: Kreutz et al.

52. (currently Amended). A depilation apparatus ~~as claimed in claim 51~~, comprising
a housing,
a depilation member for gripping hairs on human skin and pulling the hairs from the skin,
and
a vibration member for exerting mechanical vibration on the skin to thereby provide an
anaesthetizing effect on the skin while the hairs are being pulled from the skin by the depilation
member, both the depilation member and the vibration member provided in the housing,
characterized in that
the vibration member comprises flexible protrusions for contacting the skin which are
disposed on a carrier,
the vibration member vibrates while the carrier is cyclically brought towards and away
from the skin during operation of the depilator apparatus to thereby vibrate the flexible protrusions
and thereby exert mechanical vibrations on the skin where these vibrating flexible protrusions
contact the skin,
wherein the protrusions are disposed in a uniform pattern, and
wherein the protrusions have, adjacent a distal free end thereof, a conical shape.

53. (currently Amended). A depilation apparatus ~~as claimed in claim 51~~, comprising
a housing,
a depilation member for gripping hairs on human skin and pulling the hairs from the skin,
and
a vibration member for exerting mechanical vibration on the skin to thereby provide an
anaesthetizing effect on the skin while the hairs are being pulled from the skin by the depilation
member, both the depilation member and the vibration member provided in the housing,
characterized in that
the vibration member comprises flexible protrusions for contacting the skin which are
disposed on a carrier,
the vibration member vibrates while the carrier is cyclically brought towards and away
from the skin during operation of the depilator apparatus to thereby vibrate the flexible protrusions
and thereby exert mechanical vibrations on the skin where these vibrating flexible protrusions
contact the skin,
wherein the protrusions are disposed in a uniform pattern, and
wherein the protrusions each have a rounded end portion.

Cont'd

55. (currently Amended). A depilation apparatus ~~as claimed in claim 50~~, comprising
a housing,
a depilation member for gripping hairs on human skin and pulling the hairs from the skin,
and
a vibration member for exerting mechanical vibration on the skin to thereby provide an
anacsthetizing effect on the skin while the hairs are being pulled from the skin by the depilation
member, both the depilation member and the vibration member provided in the housing,
characterized in that
the vibration member comprises flexible protrusions for contacting the skin which are
disposed on a carrier,
the vibration member vibrates while the carrier is cyclically brought towards and away
from the skin during operation of the depilator apparatus to thereby vibrate the flexible protrusions
and thereby exert mechanical vibrations on the skin where these vibrating flexible protrusions
contact the skin, and wherein
each of the protrusions has, adjacent a distal free end thereof, a conical shape.

56. (previously presented). A depilation apparatus as claimed in claim 55, wherein the protrusions each have a rounded end portion.

57. (previously presented). A depilation apparatus as claimed in claim 55, wherein the protrusions comprise a resilient plastics material.

58. (currently Amended). A depilation apparatus ~~as claimed in claim 50, comprising~~
a housing,
a depilation member for gripping hairs on human skin and pulling the hairs from the skin,
and

a vibration member for exerting mechanical vibration on the skin to thereby provide an
anaesthetizing effect on the skin while the hairs are being pulled from the skin by the depilation
member, both the depilation member and the vibration member provided in the housing,

characterized in that

the vibration member comprises flexible protrusions for contacting the skin which are
disposed on a carrier,

the vibration member vibrates while the carrier is cyclically brought towards and away
from the skin during operation of the depilator apparatus to thereby vibrate the flexible protrusions
and thereby exert mechanical vibrations on the skin where these vibrating flexible protrusions
contact the skin, and wherein

the protrusions each have a rounded end portion.

59. (previously presented). A depilation apparatus as claimed in claim 58, wherein the protrusions
comprise a resilient plastics material.

60. (previously presented). A depilation apparatus as claimed in claim 50, characterized in that the
protrusions comprise a resilient plastics material.

Claims 61 through 73: Cancelled without prejudice.

Kindly add the following new claims:

74. (New). A depilation apparatus as claimed in claim 52, wherein the protrusions each have a
rounded end portion.

75. (New). A depilation apparatus as claimed in claim 52, wherein the protrusions comprise a
resilient plastics material.

76. (New). A depilation apparatus as claimed in claim 53, wherein the protrusions have, adjacent
a distal free end thereof, a conical shape.

77. (New). A depilation apparatus as claimed in claim 53, wherein the protrusions comprise a
resilient plastics material.
